COVID-19 Preparedness and Response Plan

INTRODUCTION

In order to respond to the current state of emergency related to the novel coronavirus (“COVID-19”) and to comply with relevant state and local orders related to COVID-19, the Ruth Hughes Memorial District Library (“Library”) has prepared the following COVID-19 Preparedness and Response Plan (“Plan”). This Plan may be updated as this situation evolves or as state or local orders, or federal guidance, related to COVID-19 are issued or amended.

I. GENERAL OVERVIEW

The following COVID-19 Preparedness & Response Plan has been established for the Ruth Hughes Memorial District Library in accordance with the requirements in the most recent Executive Order (“EO”) concerning employee safety and health, and all requirements therein signed by Governor Gretchen Whitmer and also in accordance with *Guidance on Preparing Workplaces for COVID-19*, developed by the Occupational Health and Safety Administration (“OSHA”). Appendix A contains the list of items all businesses and operations that are permitted to require their employees to leave their homes or residences for work must implement under the most recent EO, along with the list of additional items required for libraries.

II. BASIC INFECTION PREVENTION MEASURES

Enhanced Hygiene

Employees are instructed to wash their hands frequently, to cover their coughs and sneezes, and to avoid touching their faces. Employees will be provided with access to places to frequently wash hands or to use hand sanitizer, including upon entry. Employees will also be provided with access to tissues and to places to properly dispose of them. Signs regarding proper hand washing methods will be posted in all restrooms. Hand shaking is also prohibited to ensure good hand hygiene. The Library will provide tissues and trash receptacles where appropriate.

Workers are discouraged from using other workers’ phones, desks, offices, or other work tools and equipment, when possible. If sharing such items or spaces is not possible, then workers should wipe down any and all items and spaces prior to sharing it with another worker.

Sick Leave Policies

Workers are encouraged to stay home if they are sick. In addition, workers are permitted to take paid leave consistent with the Families First Coronavirus Response Act and the Library’s applicable PTO policies.

Remote Work

All employees whose job duties reasonably allow them to telework, will work remotely to the extent suitable. In addition, face-to-face meetings should be replaced with virtual communications to the extent possible.

Enhanced Cleaning and Disinfecting

Increased cleaning and disinfecting of surfaces, equipment, and other elements of the work environment (including special attention to parts, products, and shared equipment) will be performed several times a day using products containing Environmental Protection Agency (“EPA”) approved disinfectants. Employees will be provided with access to disposable paper towels and disinfectant so that any commonly used surfaces can be wiped down before each use. When choosing cleaning chemicals, the Library will consult information from the EPA regarding approved disinfectant labels with claims against emerging viral pathogens. The manufacturer’s instructions for use of all cleaning and disinfection products will be strictly adhered to.

Enhanced cleaning and disinfection shall be performed after persons suspected or confirmed to have COVID-19 have been in the workplace. The following methods will be used for enhanced cleaning and disinfection: the building will be closed for at least 24 hours, after which a deep clean following the CDC guidelines will be performed. These include opening doors and windows to increase air circulation; cleaning and disinfecting all areas used by the person who was sick; such as offices, restrooms, common areas, and shared equipment; vacuuming; and disinfecting with an electrostatic sprayer.

Enhanced Social Distancing

Employees are directed to perform their work in such a way so as to reasonably avoid coming within six feet of other individuals. Where possible, employees may be relocated or provided additional resources in order to avoid shared use of offices, desks, telephones, and tools/equipment. Ground markings, signs, or physical barriers may also be used, if needed. The number of employees permitted in any break room or lunch room shall be limited to ensure social distancing restrictions can be followed. Employees should remain in their assigned work area as much as possible. Employees will be provided with personal protective equipment appropriate to the exposure risk associated with the job following guidance from the Occupational Safety and Health Administration (“OSHA”) and the Centers for Disease Control and Prevention (“CDC”) applicable to the industry and types of jobs at the workplace and in accordance with applicable state orders. Physical barriers may also be installed for employees commensurate with their level of risk of exposure to COVID-19. The Library may consider alternating days, extra shifts, or work from home shifts that reduce the total number of employees in the workplace at one time to ensure social distancing can be maintained.

The Library will follow CDC and OSHA guidance with respect to prevention and mitigation measures. Various posters will be mounted within the workplace to inform employees of recommended prevention and mitigation measures. The Library will check the OSHA and CDC websites regularly for updates about recommended hygiene and mitigation measures. Finally, the Library will adopt any additional infection-control measures that are reasonable in light of the work performed at the worksite and the rate of infection in the surrounding community.

III. PROMPT IDENTIFICATION AND ISOLATION OF SICK INDIVIDUALS

Employee Screening Before Entering the Workplace

The Library has implemented a screening protocol to identify known or suspected cases of COVID-19 among employees and isolate them from the remainder of the workforce. At the beginning of each day at the start of each work shift, the Library will screen employees for signs

and symptoms of COVID-19 as required. Employees have been directed to promptly report any signs and symptoms of COVID-19 to their supervisor and the library director before and during the work shift and employees have been provided with instructions for how to make such a report to the employer. The Employee Entry Screening Questionnaire is attached as Appendix C.

A screening questionnaire should be completed by all employees before being permitted to enter the workplace and should comply with any required screening process required by the state or local jurisdiction in which the business is located. Any individual taking employee temperatures will be required to wear appropriate personal protective equipment. If an employee fails the screening process, he or she will be prevented from entering the premises until allowed to return to work under the relevant executive orders or public health orders, which requirements are explained in detail in the Return to Work Plan, attached as Appendix D. A healthcare provider's note is not required to validate an illness or to return to work (although the employee must still meet the relevant criteria to return to work).

Self-Monitoring for Symptoms

Employees are encouraged to self-monitor for signs and symptoms of COVID-19 if they suspect possible exposure. The principal symptoms of COVID-19 are (i) any one of the following not explained by a known medical or physical condition: fever, an uncontrolled cough, shortness of breath; or (ii) at least two of the following not explained by a known medical or physical condition: loss of taste or smell, muscle aches (“myalgia”), sore throat, severe headache, diarrhea, vomiting, abdominal pain. See CDC, Symptoms of Coronavirus list.

Procedures for Reporting Illness

Suspected Cases

An employee will be considered to have a Suspected Case of COVID-19 if:

- They are experiencing any of the following COVID-19 symptoms not explained by a known medical or physical condition:
 - Fever;
 - An uncontrolled cough;
 - Shortness of breath.
- OR**
- They are experiencing at least two of the following symptoms not explained by a known medical or physical condition:
 - Loss of taste or smell;
 - Muscle aches (“myalgia”);
 - Sore throat;
 - Severe headache;
 - Diarrhea;
 - Vomiting;
 - Abdominal pain.
- They have been exposed to a COVID-19 positive person, meaning:

- An immediate family member has tested positive for COVID-19; or
- In the last 14 days, the employee came into close contact (defined as being within six feet for fifteen minutes) with someone who has tested positive for COVID-19.

If an employee believes that he or she qualifies as a Suspected Case (as described above), he or she must:

- Immediately notify supervisor and library director;
- Self-quarantine until able to return to work per the guidelines in the Return to Work Plan; and
- Seek immediate medical care or advice.

If an employee qualifies as a Suspected Case, then the Library will:

- Notify all employees, contractors, or suppliers who may have come into close contact (being within less than six feet for more than fifteen minutes) with the employee in the past 14 days (while not disclosing the identity of the employee to ensure the individual's privacy); and
- Close the workplace for at least 24 hours until such time as the employee's work area and any shared areas have been thoroughly cleaned; and
- Notify the local health department immediately.

Confirmed Cases

An employee will be considered a Confirmed Case of COVID-19 if the employee has been performing in-person operations in the past 14 days and that person tested positive for COVID-19.

If an employee believes that he or she qualifies as a Confirmed Case (as described above), he or she must:

- Immediately notify supervisor and library director of his or her diagnosis; and
- Remain out of the workplace until cleared and able to return to work per the guidelines in the Return to Work Plan.

If an employee qualifies as a Confirmed Case, then the Library will:

- Notify all employees, contractors, and suppliers who may have come into close contact (being within less than six feet for a more than fifteen minutes) with the employee in the past 14 days (while not disclosing the identity of the employee to ensure the individual's privacy); and
- Close the workplace for at least 24 hours until such time as the entire workplace, or affected parts thereof (depending on employee's presence in the workplace), is thoroughly cleaned and disinfected; and
- Notify the local health department immediately; and

- Communicate with employees about the presence of a confirmed case and the cleaning/disinfecting plans and when the workplace will reopen.

Becoming Sick at Work

The Library will physically isolate any employees with known or suspected COVID-19 from the remainder of the workforce, using measures such as, but not limited to:

- (a) Not allowing known or suspected cases to report to or remain at their work location.
- (b) Sending known or suspected cases to a location (for example, home) where they are self-isolating during their illness.
- (c) If suitable, assigning known or suspected cases to work alone at the location where they are self-isolating during their illness.

Any onsite employee who appears to have a respiratory illness may be separated from other employees and/or other individuals and sent home. If such a situation arises, the Library will identify a designated area with closable doors (for example, one of the study rooms) to serve as an isolation room until such potentially sick employees can be removed from the workplace. Personnel entering any designated area will be strictly limited.

PPE

The Library will check the OSHA and CDC websites regularly for updates about recommended PPE and assess the need for PPE for employees. The following will be applied to the selection and use of PPE by employees.

All types of PPE must be:

- Selected based upon the hazard to the employee.
- Properly fitted and periodically refitted, as applicable (*e.g.*, respirators).
- Consistently and properly worn when required.
- Regularly inspected, maintained, and replaced, as necessary.
- Properly removed, cleaned, and stored or disposed of, as applicable, to avoid contamination of self, others, or the environment.

The Library will provide any required PPE in accordance with CDC and OSHA guidance as well as any state and local orders. Employees are required to wear masks when workers cannot consistently maintain six feet of separation from other individuals in the workplace. The Library will also consider face shields when workers cannot consistently maintain three feet of separation from other individuals in the workplace. The Library also encourages employees to use PPE and hand sanitizer on public transportation.

IV. ADDITIONAL WORKPLACE PROTECTIONS

Engineering Controls

The Library will implement the following engineering controls:

- Installing air scrubbers and acquiring an electrostatic disinfectant sprayer.

- Installing touchless trash bins, paper towel, soap, and sanitizer dispensers.
- Installing physical barriers, such as clear plastic sneeze guards.
- Installing social distancing floor decals and other physical markers.

Administrative Controls

The Library will implement the following administrative controls and review and implement any other necessary administrative controls as appropriate:

- Allowing telework and phone-based communication when suitable to minimize face-to-face contact.
- Minimizing face-to-face contact through reopening stages that limit public entry (i.e., curbside service, reduced occupancy.)
- Posting signage on COVID-19, social distancing, and safety requirements.
- Providing face masks and shields for patrons if needed and if supplies are available.

Non-Essential Travel

All non-essential travel is discontinued until further notice.

Working with Insurance Companies and State and Local Health Agencies

The Library will work with applicable insurance companies and state and local health agencies to provide information to workers and customers about medical care in the event of a COVID-19 outbreak.

Continue to Follow Existing OSHA Standards

The Library will continue to adhere to all applicable existing OSHA standards and requirements.

Training

The Library will coordinate and provide training to employees related to COVID-19. At minimum, we will provide training as required under state executive orders and the following:

- Workplace infection-control practices.
- The proper use of PPE.
- Routes by which the virus causing COVID-19 is transmitted from person to person.
- Distance that the virus can travel in the air, as well as the time it remains viable in the air and on environmental surfaces.
- Symptoms of COVID-19.
- Steps the worker must take to notify the business or operation of any symptoms of COVID-19 or a suspected or confirmed diagnosis of COVID-19.
- Measures that the facility is taking to prevent worker exposure to the virus, as described in this plan.
- Rules that the worker must follow in order to prevent exposure to and spread of the virus.
- The use of personal protective equipment, including the proper steps for putting it on and taking it off.
- How to report unsafe working conditions.

Recordkeeping

The Library shall maintain the required recordkeeping under state executive orders.

The following records are required to be maintained:

1. Required employee training.
2. A record of daily entry self-screening protocol for all employees or contractors entering the workplace, including, at a minimum, a questionnaire covering symptoms and suspected or confirmed exposure to people with possible COVID-19.
3. When an employee is identified with a confirmed case of COVID-19, any required notifications that are made.

Workplace Coordinator

The Library will designate one or more worksite supervisors to implement, monitor, and report on the COVID-19 control strategies developed under this COVID-19 Preparedness and Response Plan. The supervisor will be on-site at all times when employees are present on site. An on-site employee may be designated to perform the supervisory role. The designated supervisors at this time are Library Director Tracy Aldrich, followed by Adult Services Coordinator Diane Willick, Technical Services Coordinator Jessica Bostian, and Youth Services Coordinator Mandy Summers.

Additional Restrictions and Policies

In accordance with Executive Order 2020-161 issued on July 29, 2020, the Library will follow the requirements for all businesses and the additional requirements for Retail, Libraries, and Museums, listed in Appendix A.

V. EMPLOYEE CLASSIFICATIONS

OSHA has divided job tasks into four risk exposure levels: very high, high, medium, and lower risk. The Library has evaluated employee risk levels and has determined that we have employees in the following risk categories: medium. We will implement appropriate protections based on each job classification's risk level. *See* Appendix E for OSHA's classification system and How to Protect Workers at Different Classifications.

VI. BUSINESS CONTINUITY PLANS

The COVID-19 Workplace Coordinator will: (1) work with management to cross-train employees to perform essential functions so the workplace can operate even if key employees are absent; (2) identify alternate supply chains for critical goods and services in the event of disruption; and (3) develop an emergency communication plan to communicate important messages to employees and constituents.

APPENDIX A

SUMMARY OF EXECUTIVE ORDER 2020-161

Executive Order 2020-161 outlines safeguards to protect Michigan's workers from COVID-19, and rescinds the previous such order, EO-2020-145. It requires the following:

1. All businesses or operations that require their employees to leave the homes or residences for work must, at a minimum:

(a) Develop a COVID-19 preparedness and response plan, consistent with recommendations in Guidance on Preparing Workplaces for COVID-19, developed by the Occupational Health and Safety Administration (“OSHA”) and available here. Within two weeks of resuming in-person activities, a business’s or operation’s plan must be made readily available to employees, labor unions, and customers, whether via website, internal network, or by hard copy.

(b) Designate one or more worksite supervisors to implement, monitor, and report on the COVID-19 control strategies developed under subsection (a). The supervisor must remain on-site at all times when employees are present on site. An on-site employee may be designated to perform the supervisory role.

(c) Provide COVID-19 training to employees that covers, at a minimum: (1) Workplace infection-control practices. (2) The proper use of personal protective equipment. (3) Steps the employee must take to notify the business or operation of any symptoms of COVID-19 or a suspected or confirmed diagnosis of COVID-19. (4) How to report unsafe working conditions.

(d) Provide any communication and training on COVID-19 infection control practices in the primary languages common in the employee population.

(e) Place posters in the languages common in the employee population that encourage staying home when sick, cough and sneeze etiquette, and proper hand hygiene practices.

(f) Conduct a daily entry self-screening protocol for all employees or contractors entering the workplace, including, at a minimum, a questionnaire covering symptoms and suspected or confirmed exposure to people with possible COVID19.

(g) Keep everyone on the worksite premises at least six feet from one another to the maximum extent possible, including through the use of ground markings, signs, and physical barriers, as appropriate to the worksite.

(h) Provide non-medical grade face coverings to their employees, with supplies of N95 masks and surgical masks reserved, for now, for health care professionals, first responders (e.g., police officers, fire fighters, paramedics), and other critical workers.

- (i) Require face coverings to be worn when employees cannot consistently maintain six feet of separation from other individuals in the workplace, and consider face shields when employees cannot consistently maintain three feet of separation from other individuals in the workplace.
- (j) Require face coverings in shared spaces, including during in-person meetings and in restrooms and hallways.
- (k) Increase facility cleaning and disinfection to limit exposure to COVID-19, especially on high-touch surfaces (e.g., door handles), paying special attention to parts, products, and shared equipment (e.g., tools, machinery, vehicles).
- (l) Adopt protocols to clean and disinfect the facility in the event of a positive COVID-19 case in the workplace.
- (m) Make cleaning supplies available to employees upon entry and at the worksite and provide time for employees to wash hands frequently or to use hand sanitizer.
- (n) When an employee is identified with a confirmed case of COVID-19: (1) Immediately notify the local public health department, and (2) Within 24 hours, notify any co-workers, contractors, or suppliers who may have come into contact with the person with a confirmed case of COVID-19.
- (o) An employer will allow employees with a confirmed or suspected case of COVID-19 to return to the workplace only after they are no longer infectious according to the latest guidelines from the Centers for Disease Control and Prevention (“CDC”) and they are released from any quarantine or isolation by the local public health department.
- (p) Follow Executive Order 2020-36, and any executive orders that follow it, that prohibit discharging, disciplining, or otherwise retaliating against employees who stay home or who leave work when they are at particular risk of infecting others with COVID-19.
- (q) Establish a response plan for dealing with a confirmed infection in the workplace, including protocols for sending employees home and for temporary closures of all or part of the workplace to allow for deep cleaning. 5
- (r) Restrict business-related travel for employees to essential travel only.
- (s) Encourage employees to use personal protective equipment and hand sanitizer on public transportation.
- (t) Promote remote work to the fullest extent possible.
- (u) Adopt any additional infection-control measures that are reasonable in light of the work performed at the worksite and the rate of infection in the surrounding community.

Executive Order 2020-161 also incorporates libraries into the section on retail businesses, requiring them to, at minimum, do the following:

- a. Create communications material for customers (e.g., signs or pamphlets) to inform them of changes to store practices and to explain the precautions the store is taking to prevent infection.
- b. Establish lines to regulate entry in accordance with subsection (c) of this section, with markings for patrons to enable them to stand at least six feet apart from one another while waiting. Stores should also explore alternatives to lines, including by allowing customers to wait in their cars for a text message or phone call, to enable social distancing and to accommodate seniors and those with disabilities.
- c. Except in Regions 6 and 8, adhere to the following restrictions:
 1. For stores of less than 50,000 square feet of customer floor space, must limit the number of people in the store (including employees) to 25% of the total occupancy limits established by the State Fire Marshal or a local fire marshal. Stores of more than 50,000 square feet must:
 - A. Limit the number of customers in the store at one time (excluding employees) to 4 people per 1,000 square feet of customer floor space.
 - B. Create at least two hours per week of dedicated shopping time for vulnerable populations, which for purposes of this order are people over 60, pregnant women, and those with chronic conditions, including but not limited to heart disease, diabetes, and lung disease.
 2. The director of the Department of Health and Human Services is authorized to issue an emergency order varying the capacity limits described in this subsection as necessary to protect the public health.
- d. Post signs at store entrance(s) instructing customers of their legal obligation to wear a face covering when inside the store.
- e. Post signs at store entrance(s) informing customers not to enter if they are or have recently been sick.
- f. Design spaces and store activities in a manner that encourages employees and customers to maintain six feet of distance from one another.
- g. Install physical barriers at checkout or other service points that require interaction, including plexiglass barriers, tape markers, or tables, as appropriate.
- h. Establish an enhanced cleaning and sanitizing protocol for high-touch areas like restrooms, credit-card machines, keypads, counters, shopping carts, and other surfaces.
- i. Train employees on:
 1. Appropriate cleaning procedures, including training for cashiers on cleaning between customers.
 2. How to manage symptomatic customers upon entry or in the store.

- j. Notify employees if the employer learns that an individual (including a customer or supplier) with a confirmed case of COVID-19 has visited the store.
- k. Limit staffing to the minimum number necessary to operate.

APPENDIX B

SUMMARY OF EXECUTIVE ORDER 2020-172

Executive Order 2020-172 outlines protections and instructions for Michigan's workers who must quarantine when they or their close contacts are sick or suspected to be sick from COVID-19, and rescinds the previous such order, EO-2020-166. It requires the following:

1. It is the public policy of this state that an employer shall not discharge, discipline, or otherwise retaliate against an employee for staying home when he or she is at particular risk of infecting others with COVID-19. To effectuate that policy:

(a) Employers are prohibited from discharging, disciplining, or otherwise retaliating against an employee described in sections 2 or 3 of this order for staying home from work for the periods described in those sections.

(b) Employers must treat such an employee as if he or she were taking medical leave under the Paid Medical Leave Act, 2018 PA 338, as amended, MCL 408.961 et seq.

(1) To the extent that the employee has no paid leave, the leave may be unpaid. Employers are permitted, but not required, to debit any hours that an employee described in sections 2 or 3 of this order stays home from work from the employee's accrued leave.

(2) The length of such leave is not limited by the amount of leave that an employee has accrued under MCL 408.963 and must extend, whether paid or unpaid, as long as the employee remains away from work within the time periods described in sections 2 or 3 of this order.

(c) Nothing in this section shall be taken to prevent an employer from discharging or disciplining an employee:

(1) Who is allowed to return to work under sections 2 or 3 of this order but declines to do so;

(2) With the employee's consent (e.g., if the employee asks to be discharged); or

(3) For any other reason that is not unlawful.

(d) The director of the Department of Labor and Economic Opportunity shall have authority to enforce this order in the same manner and to the same extent as the director enforces the Paid Medical Leave Act under section 7 of that act, MCL 408.967. In addition, the director shall refer all credible complaints of violations to the relevant licensing authority.

2. Subject to the exceptions in section 5 of this order, it is the public policy of this state that any and all individuals who test positive for COVID-19 or who display the principal symptoms of COVID-19 should (apart from seeking medical care) remain in their home or place of residence until:

(a) 24 hours have passed since the resolution of fever without the use of fever-reducing medications;

(b) 10 days have passed since their symptoms first appeared or since they were swabbed for the test that yielded the positive result; and

(c) other symptoms have improved.

3. Subject to the exceptions in section 5 of this order, it is the public policy of this state that any and all people who have had close contact with an individual who tests positive for COVID-19 or with an individual who displays the principal symptoms of COVID-19 should remain in their home or place of residence (apart from seeking medical care) until either:

(a) 14 days have passed since the last close contact with the sick or symptomatic individual;

or

(b) The individual displaying COVID-19 symptoms receives a negative COVID-19 test.

4. Section 3 does not apply to the following classes of workers, provided that their employers' rules governing occupational health allow them to go to work:

(a) Health care professionals.

(b) Workers at a health care facility, as defined in section 7(d) of this order.

(c) First responders (e.g., police officers, fire fighters, paramedics, emergency medical technicians).

(d) Child protective service employees.

(e) Workers at child caring institutions, as defined in section 1 of Public Act 116 of 1973, MCL 722.111.

(f) Workers at adult foster care facilities, as defined in the Adult Foster Care Facility Licensing Act, MCL 400.703(4).

(g) Workers at correctional facilities.

5. An individual described in sections 2 or 3 of this order who voluntarily returns to work (i.e. without threat of discharge, discipline, or retaliation from their employer) prior to the periods

specified in sections 2 or 3, respectively, shall not be entitled to the protections against discharge, discipline, or retaliation provided under section 1 of this order.

6. It is the public policy of this state that individuals with a suspected or confirmed COVID-19 infection or who have had close contact with such an individual (i.e. individuals described in sections 2 and 3 of this order) should leave the home or place of residence only:

(a) To the extent absolutely necessary to obtain food, medicine, medical care, or supplies that are needed to sustain or protect life, where such food, medicine, medical care, or supplies cannot be obtained via delivery. All food, medicine, and supplies should be picked up at the curbside to the fullest extent possible.

(b) To engage in outdoor activity, including walking, hiking, running, cycling, or any other recreational activity consistent with remaining at least six feet from people from outside their household.

7. For purposes of this order:

(a) “The principal symptoms of COVID-19” are (i) any one of the following not explained by a known medical or physical condition: fever, an uncontrolled cough, shortness of breath; or (ii) at least two of the following not explained by a known medical or physical condition: loss of taste or smell, muscle aches (“myalgia”), sore throat, severe headache, diarrhea, vomiting, abdominal pain.

(b) “Employer” means the same as it does in section 2(f) of the Paid Medical Leave Act, MCL 408.962(f), except that it shall also include employers with fewer than 50 employees.

(c) “Close contact” means being within six feet of an individual for fifteen minutes.

(d) “Health care facility” means the following facilities, including those which may operate under shared or joint ownership:

(1) The entities listed in section 20106(1) of the Public Health Code, 1978 PA 368, as amended MCL 333.20106(1).

(2) State-owned hospitals and surgical centers.

(3) State-operated outpatient facilities.

(4) State-operated veterans facilities.

(5) Entities used as surge capacity by any of the entities listed in subdivisions (1)-(4) of this subsection.

8. Nothing in this order shall be taken to create a private right of action against an employer for failing to comply with section 1 of this order or against an individual for acting contrary to the public policies of sections 2, 3, 5, or 6 of this order.

APPENDIX C

EMPLOYEE ENTRY SCREENING QUESTIONNAIRE

In order to access the workplace, I affirm that in the past 24 hours, I have not experienced any of these symptoms not explained by a known medical or physical condition:

- _____ Fever
- _____ An uncontrolled cough
- _____ Shortness of breath

Or at least two of the following symptoms not explained by a known medical or physical condition:

- _____ Loss of taste or smell
- _____ Muscle aches (“myalgia”)
- _____ Sore throat
- _____ Severe headache
- _____ Diarrhea
- _____ Vomiting
- _____ Abdominal pain

If you answer “yes” to any of the symptoms listed above, you will not be permitted access to the premises. Please self-isolate at home, contact your primary care physician for direction, and follow the Return to Work Plan guidelines.

In the past 14 days have you:

- _____ Had close contact (within six (6) feet for fifteen (15) minutes) with someone with a diagnosis of COVID-19?

If you answer “yes”, you are not permitted access to the premises. Self-quarantine at home, and follow the Return to Work Plan guidelines.

If no to all of the above, please check and sign below and proceed to enter the workplace premises:

- _____ I will wear a face covering while required in any public spaces within the premises.

Signature: _____ Date: _____

APPENDIX D

EMPLOYEE RETURN TO WORK PLAN

Consistent with Executive Orders 2020-161 and 2020-172, employees who fail entrance screening will only be permitted to return to work under the following circumstances.

Employees who test positive for COVID-19 or display the principal symptoms of COVID-19 will not be permitted to return to work until:

- 24 hours have passed since the resolution of fever without the use of fever-reducing medications; **and**
- 10 days have passed since their symptoms first appeared or since they were swabbed for the test that yielded the positive result; **and**
- Other symptoms have improved.

Employees who have had close contact (being within six feet for 15 minutes) with an individual who tests positive for COVID-19 or with an individual who displays the principal symptoms of COVID-19 will not be permitted to return to work until either:

1. 14 days have passed since the last close contact with the sick or symptomatic individual; **or**
2. The individual displaying COVID-19 symptoms receives a negative COVID-19 test.

APPENDIX E

OSHA GUIDANCE FOR CLASSIFICATIONS

(See OSHA Guidance on Preparing Workplaces for COVID-19, pp 20-25)

Very High Exposure Risk:

Very high exposure risk jobs are those with high potential for exposure to known or suspected sources of COVID-19 during specific medical, postmortem, or laboratory procedures.

Workers in this category include:

- Healthcare workers (*e.g.*, doctors, nurses, dentists, paramedics, emergency medical technicians) performing aerosol-generating procedures (*e.g.*, intubation, cough induction procedures, bronchoscopies, some dental procedures and exams, or invasive specimen collection) on known or suspected COVID-19 patients.
- Healthcare or laboratory personnel collecting or handling specimens from known or suspected COVID-19 patients (*e.g.*, manipulating cultures from known or suspected COVID-19 patients).
- Morgue workers performing autopsies, which generally involve aerosol-generating procedures, on the bodies of people who are known to have, or suspected of having, COVID-19 at the time of their death.

High Exposure Risk:

High exposure risk jobs are those with high potential for exposure to known or suspected sources of COVID-19. Workers in this category include:

- Healthcare delivery and support staff (*e.g.*, doctors, nurses, and other hospital staff who must enter patients' rooms) exposed to known or suspected COVID-19 patients. (Note: when such workers perform aerosol-generating procedures, their exposure risk level becomes *very high*.)
- Medical transport workers (*e.g.*, ambulance vehicle operators) moving known or suspected COVID-19 patients in enclosed vehicles.
- Mortuary workers involved in preparing (*e.g.*, for burial or cremation) the bodies of people who are known to have, or suspected of having, COVID-19 at the time of their death.

Medium Exposure Risk:

Medium exposure risk jobs include those that require frequent and/or close contact with (*i.e.*, within 6 feet) people who may be infected with COVID-19, but who are not known or suspected COVID-19 patients. In areas without ongoing community transmission, workers in this risk group may have frequent contact with travelers who may return from international locations with widespread COVID-19 transmission. In areas where there *is* ongoing community transmission, workers in this category may have contact with the general public (*e.g.*, schools, high-population density work environments, some high-volume retail settings).

Lower Exposure Risk (Caution):

Lower exposure risk (caution) jobs are those that do not require contact with people known to be, or suspected of being, infected with COVID-19 nor frequent close contact with (*i.e.*, within 6 feet of) the general public. Workers in this category have minimal occupational contact with the public and other coworkers.

The Ruth Hughes Memorial District Library's jobs all fall under the Medium Exposure Risk classification.

Jobs Classified as Medium Exposure Risk: What to Do to Protect Workers

In workplaces where workers have medium exposure risk, employers should follow the guidance in “Steps All Employers Can Take to Reduce Workers’ Risk of Exposure to SARS-CoV-2” in OSHA’s Guidance, beginning on page 7, and implement control measures described in this section.

Engineering Controls

- Install physical barriers, such as clear plastic sneeze guards, where feasible.

Administrative Controls:

- Consider offering face masks to ill employees and customers to contain respiratory secretions until they are able leave the workplace (*i.e.*, for medical evaluation/care or to return home). In the event of a shortage of masks, a reusable face shield that can be decontaminated may be an acceptable method of protecting against droplet transmission. See CDC/ NIOSH guidance for optimizing respirator supplies, which discusses the use of surgical masks, at: www.cdc.gov/coronavirus/2019-ncov/hcp/respirators-strategy.
- Keep customers informed about symptoms of COVID-19 and ask sick customers to minimize contact with workers until they are healthy again, such as by posting signs about COVID-19 in stores where sick customers may visit (*e.g.*, pharmacies) or including COVID-19 information in automated messages sent when prescriptions are ready for pick up.
- Where appropriate, limit customers’ and the public’s access to the worksite, or restrict access to only certain workplace areas.
- Consider strategies to minimize face-to-face contact (*e.g.*, drive through windows, phone-based communication, telework).
- Communicate the availability of medical screening or other worker health resources (*e.g.*, on-site nurse; telemedicine services).

Personal Protective Equipment (PPE)

When selecting PPE, consider factors such as function, fit, decontamination ability, disposal, and cost. Sometimes, when PPE will have to be used repeatedly for a long period of time, a more

expensive and durable type of PPE may be less expensive overall than disposable PPE. Each employer should select the combination of PPE that protects workers specific to their workplace.

Workers with medium exposure risk may need to wear some combination of gloves, a gown, a face mask, and/or a face shield or goggles. PPE ensembles for workers in the medium exposure risk category will vary by work task, the results of the employer's hazard assessment, and the types of exposures workers have on the job.

In rare situations that would require workers in this risk category to use respirators, see the PPE section beginning on page 14 of [OSHA's] booklet, which provides more details about respirators. For the most up-to-date information, visit OSHA's COVID-19 webpage: www.osha.gov/covid-19

APPENDIX F

EXAMPLE CHARTS

Employee Classification Determinations:

Positions/job/task	Determination (low, medium, high, very high)	Qualifying Factors (e.g., no public contact, public contact, job task description)
Library Director	Medium	Public contact
Department Coordinators	Medium	Public contact
Library Assistants	Medium	Public contact
Pages	Medium	Public contact
Custodian	Medium	Cleaning public restrooms

Engineering Controls:

Positions/job/task	Engineering Control Implemented (e.g., clear plastic sneeze guard installed)
Assistants, Pages, Coordinators	Plastic sneeze guards at service desks
Assistants, Pages, Coordinators	Social distancing floor decals & other markers
All staff	Air scrubbers added; touchless trash bins, paper towel, soap, and sanitizer dispensers installed; electrostatic disinfectant sprayer acquired

Administrative Controls:

Positions/job/task	Administrative Control Type Implemented (e.g., minimize face-to-face contact/post signs, etc.)
All staff	Minimized face to face contact through reopening stages that limit public access to building (i.e., curbside only)
Director & Coordinators	Telework when suitable to minimize contact or reduce number of staff in building
All staff	Supply of face masks and shields for public if needed/available
All staff	Posted signage on COVID-19, social distancing, safety

Cleaning Schedule:

Type of Surface	Method/Disinfectant Used	Schedule/Frequency
Workspaces – desks, etc.	Cleaning/disinfecting solutions	Twice each shift
Common touch areas	Cleaning/disinfecting solutions	At least three times daily
Public restroom	Cleaning/disinfecting solutions	Once daily (increased from every other day)
Staff restroom	Cleaning/disinfecting solutions	After each use by that staffer

Additional PPE Selections:

Positions/job/task	PPE (e.g., face shields, etc.)
All staff	Masks –disposable “surgical” & reusable, washable fabric
All staff	Face shields
All staff	Disposable gloves
All staff	Personal refillable bottle of hand sanitizer

APPENDIX G

**RUTH HUGHES MEMORIAL DISTRICT LIBRARY
COVID-19 PREPAREDNESS AND RESPONSE PLAN**

Certification by Responsible Public Official

This is to certify that I have reviewed the [Municipality] COVID-19 Preparedness and Response Plan attached hereto and to the best of my knowledge and belief:

1. It complies with Michigan Executive Order(s) 2020-36, 2020-96 and 2020-161.
2. The plan is consistent with the guidance from U. S. Department of Labor, Occupational Health and Safety Administration publication OSHA 3990-03-2020, Guidance on Preparing Workplaces for COVID -19.
3. The plan is available on the Ruth Hughes Memorial District Library website www.ruthhughes.org and at each Ruth Hughes Memorial District Library facility where in-person operations take place during the COVID-19 emergency.

I declare that the foregoing is true and correct.

Municipality/Entity: Ruth Hughes Memorial District Library

Signature: *Tracy Aldrich (signed electronically)*

Name of Official: Tracy Aldrich

Title: Library Director

Date: August 28, 2020
