

*The library's Strategic Plan for 2021- 2025 hopes to improve services for the community using the resources provided by the recently passed millage and a bequest from the Farley Trust.*

*As the world recovers from the historic pandemic of 2020, the library's goal is to identify ways it can help the community move forward to a brighter future.*

### **Strategic Plan 2021-2025**

---

*Establishing connections,  
empowering imaginations,  
enriching lives.*

## Goal #1 - Establishing Connections

---

- We will continue improving our technology offerings to provide up-to-date services. Such improvements may include:
  - converting hardware to a server based system for improved cost savings and efficiency.
  - updating and increasing computer services in the youth area.
- We will look for ways to continue increasing digital resources available for checkout and download.

## Goal #2 - Empowering Imaginations

---

- We will look for ways to expand our collections to include non-traditional items, broadening the range of materials our patrons can utilize.
- We will work to add educational and entertaining kits for children and families.
- We will explore ways to provide equipment and resources for patrons to host meetings and conduct business.

## Goal #3 - Enriching Lives

---

- We will continue expanding our programming offerings to meet the needs and interests of a diverse range of visitors.
- We will strengthen our participation in community events and increase our collaboration with local schools and other organizations, working to make our library a center of the community.
- We will watch for new needs our patrons may have in the wake of 2020's pandemic, and look for ways to help meet those needs.
